Thanks Roy - would it make more sense to post both at the same time so everything is up at once?

David -- The data packages for the last two homes in Dimock have been delivered. Our program staff is ready now to post the data for the two individual homes on the OSC website, and modify the summary table by sometime tomorrow. There was nothing noteworthy about the data results from these two wells that would cause us to modify our previous messaging. We do not plan to notify the media unless you think it is warranted.

Please advise on whether you are okay with us posting the data for these last two homes today and then modifying the compilation data tomorrow. Thank you.
